DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7 and 8-14 are drawn to simultaneous writing/verifying process, classified in class 711, subclass 168.
 - II. Claims 15-51 are drawn to accessing dynamic storage device, classified in class 711, subclass 111.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as verifying (reading) previously written logic filed during writing process, but in subcombination 2, writing and reading processes do not occur simultaneously. See MPEP § 806.05(d).
3. Because these inventions are independent or distinct for the reasons given above and acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

4. Also, because these inventions are independent or distinct for the reasons given above and the inventions require a different filed of search (see MPEP 808.02), restriction for examination purposes as indicated is proper.

5. Applicant is advised that for the response to this requirement to be complete it must include an election or the invention to be examined even though the requirement be traversed.
